

1-844-394-3900

Let us dig for you with our **CAT Premier Oilfield Equipment Chassis**, a fast, safe, and effective alternative to traditional excavation. Due to its **remarkable water pressure and vacuum**, it will take on the most challenging work applications, even in harsh jobsite environments. By digging with water and suction, it **eliminates possible costly underground repairs** to existing buried lines, cables, and piping. It also **has the capability to go through frozen ground** due to its heated water pressure and vacuum. Request a quote for IHE Services today!
